### SEA WHAT'S AFLOAT

Tracy Arm Fjord is located in the Inside Passage approximately 45 miles south of Juneau. Cruise ships wind their way through the fjord which is located in the Tongass National Forest. The surrounding mountains are approximately 7,000 feet high and numerous waterfalls, created by melting snowcaps, can be seen along the route. The Twin Sawyer Glaciers, North Sawyer and South Sawyer, are located at the end of Tracy Arm. Wildlife is abundant and native animals include but are not limited to whales, sea lions, bald eagles, black bears, and mountain goats.

Due to the microscopic sediment or glacial flour, the water is a glacial blue.

Narration is at maximum levels permitted by local regulations and may seem quiet. Narration will also be broadcast on channel 251.
