## An Overview of Barbados

Barbados is a coral island, pushed out of the sea by volcanic activity in a distant time. On the West Coast of Barbados, coral shore beaches of fine white sand stretch along a blue green sea. Coral reefs fringe the Barbados shoreline to provide excellent snorkeling and scuba diving. Along the east coast a lively surf is blown briskly by the strong and constant trade winds and the waves pound against a rocky shore. The constant breeze of the trade winds give Barbados a mild and pleasant tropical climate. Barbadians, called Bajans, are friendly souls, always ready to greet you with a sincere smile. Only 21 miles long by 14 miles wide, Barbados is small in size, but big in romance. Its lovely white sand beaches, tropical nights and picturesque scenery is why some consider Barbados the real fantasy island. Barbados is the most easterly island in the Caribbean island chain and has a resident population of 260,000. It's one of the few islands not discovered by Christopher Columbus and settled by the English. This is why there's a strong love affair between Barbados and England today.
