An Overview of St. Lucia

St. Lucia is located in the Caribbean Sea on the boundary of the Atlantic Ocean. Part of the Lesser Antilles, it sits north/northeast of the island of Saint Vincent, northwest of Barbados and south of Martinique. It covers a land area of 238 square miles and has a population of 174,000 (2010).

The volcanic island of Saint Lucia is more mountainous than many other Caribbean islands, with the highest point being Mount Gimie, 3,120 feet above sea level. Two other mountains, the Pitons, form the island's most famous landmark. They are located between Soufrière and Choiseul on the western side of the island. Saint Lucia is also one of the few islands in the world that boasts a drive-in volcano.

The capital city of Saint Lucia is Castries (population 60,263), where 32.4% of the population lives. Major towns include Gros Islet, Soufrière and Vieux Fort. The local climate is tropical, moderated by northeast trade winds, with a dry season from December to May, and a wet season from June to November.
